1 Safety

Observe the following safety instructions.

1.1 General information

- Read this instruction manual carefully.
- Keep the instruction manual and the product information safe for future reference or for the next owner.
- Do not connect the appliance if it has been damaged in transit.

1.2 Intended use

This appliance is only intended to be fully fitted in a kitchen. Only use this appliance:

- As specified in this instruction manual.
- For chilling food.
- In private households and in enclosed spaces in a domestic environment.
- Up to an altitude of max. 2000 m above sea level.

1.3 Restriction on user group

This appliance may be used by children aged 8 or over and by people who have reduced physical, sensory or mental abilities or inadequate experience and/or knowledge, provided that they are supervised or have been instructed on how to use the appliance safely and have understood the resulting dangers. Children must not play with the appliance. Cleaning and user maintenance must not be performed by children unless they are being supervised. Children above the age of three years old and younger than eight years old may load and unload the fridge-freezer.

1.4 Safe transport

⚠️ WARNING – Risk of injury!
The high weight of the appliance may result in injury when lifted. ► Do not lift the appliance on your own.
1.5 Safe installation

⚠️ WARNING – Risk of electric shock!
Improper installation is dangerous.
▶ Connect and operate the appliance only in accordance with the specifications on the rating plate.
▶ Connect the appliance to a power supply with alternating current only via a properly installed socket with earthing.
▶ The protective conductor system of the domestic electrical installation must be properly installed.
▶ Never equip the appliance with an external switching device, e.g. a timer or remote control.
▶ When the appliance is installed, the mains plug of the power cord must be freely accessible. If free access is not possible, an all-pole isolating switch must be installed in the permanent electrical installation according to the installation regulations.
▶ When installing the appliance, check that the power cable is not trapped or damaged.
If the insulation of the power cord is damaged, this is dangerous.
▶ Never let the power cord come into contact with heat sources.

⚠️ WARNING – Risk of explosion!
If the appliance's ventilation openings are sealed, a leak in the refrigeration circuit may result in a flammable mixture of gas and air.
▶ Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

⚠️ WARNING – Risk of fire!
It is dangerous to use an extended power cord and non-approved adapters.
▶ Do not use extension cables or multiple socket strips.
▶ If the power cord is too short, contact Customer Service.
▶ Only use adapters approved by the manufacturer.
Portable multiple socket strips or portable power supply units may overheat and cause a fire.
▶ Do not place portable multiple socket strips or power supply units on the back of the appliance.
1.6 Safe use

⚠️ **WARNING – Risk of electric shock!**
An ingress of moisture can cause an electric shock.
- Only use the appliance in enclosed spaces.
- Never expose the appliance to intense heat or humidity.
- Do not use steam- or high-pressure cleaners to clean the appliance.

⚠️ **WARNING – Risk of suffocation!**
Children may put packaging material over their heads or wrap themselves up in it and suffocate.
- Keep packaging material away from children.
- Do not let children play with packaging material.
Children may breathe in or swallow small parts, causing them to suffocate.
- Keep small parts away from children.
- Do not let children play with small parts.

⚠️ **WARNING – Risk of explosion!**
Mechanical devices or other devices may damage the refrigeration circuit; flammable refrigerant may escape and explode.
- To accelerate the defrosting process, do not use any other mechanical devices or devices other than those recommended by the manufacturer.
Products which contain flammable propellants and explosive substances may explode, e.g. spray cans.
- Do not store products which contain flammable propellants (e.g. spray cans) or explosive substances in the appliance.

⚠️ **WARNING – Risk of fire!**
Electrical devices within the appliance may cause a fire, e.g. heaters or electric ice makers.
- Do not operate electrical devices within the appliance.
**WARNING – Risk of injury!**
Injury to the eyes caused by escaping flammable refrigerant and hazardous gases.
▶ Do not damage the tubes of the refrigerant circuit or the insulation.

**CAUTION – Risk of harm to health!**
To prevent food from being contaminated, you must observe the following instructions.
▶ If the door is open for an extended period of time, this may lead to a considerable temperature increase in the compartments of the appliance.
▶ Regularly clean the surfaces that may come into contact with food and accessible drain systems.
▶ Store raw meat and fish in suitable containers in the refrigerator so that they do not touch or drip on other food.
▶ If the fridge/freezer is empty for an extended period of time, switch off the appliance, defrost it, clean it and leave the door open to prevent the formation of mould.

Metal or metal-style parts in the appliance may contain aluminium. If acidic food comes into contact with aluminium in the appliance, aluminium foil ions may pass into the food.
▶ Do not consume soiled food.

**1.7 Damaged appliance**

**WARNING – Risk of electric shock!**
If the appliance or the power cord is damaged, this is dangerous.
▶ Never operate a damaged appliance.
▶ Never pull on the power cord to unplug the appliance. Always unplug the appliance at the mains.
▶ If the appliance or the power cord is damaged, immediately unplug the power cord or switch off the fuse in the fuse box.
▶ Call customer services. → Page 39
Incorrect repairs are dangerous.
▶ Repairs to the appliance should only be carried out by trained specialist staff.
▶ Only use genuine spare parts when repairing the appliance.
If the power cord of this appliance is damaged, it must be re-placed by the manufacturer, the manufacturer's Customer Ser-vice or a similarly qualified person in order to prevent any risk.

⚠️ WARNING – Risk of fire!

If the tubes are damaged, flammable refrigerant and harmful gases may escape and ignite.

- Keep naked flames and ignition sources away from the appli-ance.
- Ventilate the room.
- Switch off the appliance. → Page 32
- Unplug the appliance from the mains or switch off the circuit breaker in the fuse box.
- Call after-sales service. → Page 39
2 Preventing material damage

ATTENTION!
Using the base, runners or appliance doors as a seat surface or climbing surface may damage the appliance.
- Do not stand or support yourself on the base, runners or doors.
- Contamination with oil or fat may cause plastic parts and door seals to become porous.
- Keep plastic parts and door seals free of oil and grease.
- Metal or metal-style parts in the appliance may contain aluminium. Aluminium reacts when it comes into contact with acidic foods.
- Do not store unpackaged food in the appliance.

3 Environmental protection and saving energy

3.1 Disposing of packaging
The packaging materials are environmentally compatible and can be recycled.
- Sort the individual components by type and dispose of them separately.

3.2 Saving energy
If you follow these instructions, your appliance will use less power.

Selecting the installation location
- Keep the appliance out of direct sunlight.
- Install the appliance as far away as possible from heating elements, cookers and other heat sources:
  - Maintain a 30 mm clearance to electric or gas cookers.
  - Maintain a 300 cm clearance to oil or solid-fuel cookers.
- Use a niche depth of 560 mm.
- Never cover or block the exterior ventilation grilles.

Saving energy during use
Note: The arrangement of the fittings does not affect the energy consumption of the appliance.
- Open the appliance only briefly.
- Never cover or block the interior ventilation openings or the exterior ventilation grilles.
- Transport purchased food in a cool bag and place in the appliance quickly.
- Allow warm food and drinks to cool down before storing them.
- Thaw frozen food in the refrigerator compartment to utilise the low temperature of the food.
- Always leave some space between the food and to the back panel.
- Pack the food airtight.

4 Installation and connection
You can find out where and how best to install your appliance here. You will also learn how to connect your appliance to the power supply.

4.1 Scope of delivery
After unpacking all parts, check for any transport damage and for completeness of delivery.
If you have any complaints, contact your dealer or our after-sales service → Page 39.
The delivery consists of the following:
- Built-in appliance
Installation and connection

- Equipment and accessories
- Installation material
- Installation instructions
- User manual
- Customer service directory
- Warranty enclosure
- Energy label
- Information on energy consumption and noises

4.2 Criteria for the installation location

⚠️ WARNING
Risk of explosion!
If the appliance is in a space that is too small, a leak in the refrigeration circuit may result in a flammable mixture of gas and air.

▶ Only install the appliance in a space with a volume of at least $1 \text{ m}^3$ per 8 g refrigerant. The volume of refrigerant is indicated on the rating plate. → Fig. 1/3

The weight of the appliance ex works may be up to 70 kg depending on the model.
The subfloor must be sufficiently stable to bear the weight of the appliance.

Permitted room temperature
The permitted room temperature depends on the appliance’s climate class.
The climate class can be found on the rating plate. → Fig. 1/3

<table>
<thead>
<tr>
<th>Climate class</th>
<th>Permitted room temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td>SN</td>
<td>10 °C to 32 °C</td>
</tr>
<tr>
<td>N</td>
<td>16 °C to 32 °C</td>
</tr>
</tbody>
</table>

4.3 Installing the appliance

▶ Install the appliance in accordance with the enclosed installation instructions.

4.4 Preparing the appliance for the first time

1. Remove the informative material.
2. Remove the protective foil and transit bolts, e.g. remove the adhesive strips and carton.
3. Clean the appliance for the first time. → Page 34

4.5 Connecting the appliance to the electricity supply

1. Insert the mains plug of the appliance's power cable in a socket nearby.
   The connection data of the appliance can be found on the rating plate. → Fig. 1
   1
2. Check the mains plug is inserted properly.
   ✔ The appliance is now ready for use.

5 Familiarising yourself with your appliance

5.1 Appliance
You can find an overview of the parts of your appliance here.

Note: Deviations between your appliance and the diagrams may differ with regard to their features and size.
   → Fig. 1

1 Controls
2 Fruit and vegetable container → Page 31
3 Rating plate
4 Door storage compartment for large bottles

5.2 Control panel
You can use the control panel to configure all functions of your appliance and to obtain information about the operating status.
   → Fig. 2

1 °C sets the temperature of the refrigerator compartment.
2 Super lights up when Super cooling is switched on.
3 Displays the set temperature for the refrigerator compartment in °C.
4 ○ switches the appliance on or off.

6 Features
The features of your appliance depend on the model.

6.1 Shelf
To vary the shelf as required, you can remove the shelf and re-insert it elsewhere.
   → "Removing the shelf", Page 35

6.2 Fruit and vegetable container
Store fresh fruit and vegetables in the fruit and vegetable container.
Condensation may form in the fruit and vegetable container depending on the food and quantity stored.
Remove the condensation with a dry cloth.
To ensure that the quality and aroma are retained, store fruit and vegetables that are sensitive to cold outside of the appliance at temperatures of approx. 8 °C to 12 °C, e.g. pine-apple, bananas, citrus fruits, cucumbers, courgettes, peppers, tomatoes and potatoes.
6.3 Door racks
To adjust the door racks as required, you can remove the door rack and re-insert elsewhere.
→ "Removing door racks", Page 35

6.4 Accessories
Use original accessories. These have been made especially for your appliance.
The accessories for your appliance depend on the model.

Egg tray
Store eggs safely on the egg tray.

7 Basic operation

7.1 Switching on the appliance
1. Press 0.
   ✓ The appliance begins to cool.
2. Set the required temperature.
   → Page 32

7.2 Operating tips
- Once you have switched on the appliance, the set temperature is only reached after several hours. Do not put any food in the appliance until the temperature has been reached.
- When you close the door, a vacuum may be created. The door is then difficult to open again. Wait a moment until the vacuum is offset.

7.3 Switching off the appliance
- Press 0.

7.4 Setting the temperature
Setting the refrigerator compartment temperature
- Press °C repeatedly until the temperature display shows the required temperature.
The recommended temperature in the refrigerator compartment is 4 °C.
→ ""OK" sticker", Page 33

8 Additional functions

8.1 Super cooling
With Super cooling, the refrigerator compartment cools so that it as cold as possible. Switch on Super cooling before placing large quantities of food in the freezer compartment.

Note: When Super cooling is switched on, increased noise may occur.

Switching on Super cooling
- Press °C repeatedly until Super lights up.

Note: After approx. 15 hours, the appliance switches to normal operation.

Switching off Super cooling
- Press °C.
9 Refrigerator compartment

You can keep meat, sausage, fish, dairy products, eggs, prepared meals and pastries in the refrigerator compartment. The temperature can be set from 2 °C to 8 °C. The recommended temperature in the refrigerator compartment is 4 °C. → "OK" sticker, Page 33

The refrigerator compartment can also be used to store highly perishable foods in the short to medium term. The lower the selected temperature, the longer the food remains fresh.

9.1 Tips for storing food in the refrigerator compartment

- Only store food when fresh and undamaged.
- Observe the best-before date or use-by date specified by the manufacturer.
- Store food well wrapped or covered.
- Allow hot food and drinks to cool down first before placing in the appliance.

9.2 Chill zones in the refrigerator compartment

The air circulation in the refrigerator compartment creates different chill zones.

Coldest zone
The coldest zone is between the arrow stamped on the side and the shelf underneath.

Tip: Store highly perishable food such as fish, sausages and meat in the coldest zone.

Warmest zone
The warmest zone is at the very top of the door.

Tip: Store food that does not spoil easily in the warmest zone, e.g. hard cheese and butter. Cheese can then continue to release its aroma and the butter will still be easy to spread.

9.3 "OK" sticker

The "OK" sticker lets you check whether the refrigerator compartment reaches the safe temperature ranges of +4 °C or colder recommended for food. The "OK" sticker is not included with all models. If the sticker does not indicate "OK", gradually reduce the temperature. → "Setting the refrigerator compartment temperature", Page 32

Once the appliance is switched on, it may take up to 12 hours until the set temperature is reached.

OK
Correct setting

10 Defrosting

10.1 Defrosting in the refrigerator compartment

When the appliance is operating, condensation droplets or frost form on the rear panel of the refrigerator compartment due to functional reas-
Cleaning and servicing

The back panel in the refrigerator compartment defrosts automatically. Condensation runs through the condensation channel into the drainage hole to the evaporation pan and does not have to be wiped away. To ensure that the condensation can drain and odours do not form, observe the following information:
→ "Cleaning the condensation channel and drainage hole", Page 35.

11 Cleaning and servicing

To keep your appliance working efficiently for a long time, it is important to clean and maintain it carefully. Customer Service must clean inaccessible points. Cleaning by customer service can give rise to costs.

11.1 Preparing the appliance for cleaning

1. Switch off the appliance. → Page 32
2. Disconnect the appliance from the power supply.
   Unplug the appliance from the mains or switch off the circuit breaker in the fuse box.
3. Take out all of the food and store it in a cool place.
   Place ice packs (if available) onto the food.
4. If there is a layer of hoarfrost, allow this to defrost.
5. Remove all fittings from the appliance. → Page 35

11.2 Cleaning the appliance

⚠️ WARNING
Risk of electric shock!
An ingress of moisture can cause an electric shock.
- Do not use steam- or high-pressure cleaners to clean the appliance.
- The rinsing water must not drip into the lighting or controls can be dangerous.
- The rinsing water must not drip into the lighting or controls.

ATTENTION!
Unsuitable cleaning products may damage the surfaces of the appliance.
- Do not use hard scouring pads or cleaning sponges.
- Do not use harsh or abrasive detergents.
- Do not use cleaning products with a high alcohol content.
If liquid gets into the drainage hole, the evaporation pan may overflow.
- The rinsing water must not get into the drainage hole.
If you clean fittings and accessories in the dishwasher, this may cause them to become deformed or discolour.
- Never clean fittings and accessory in the dishwasher.

1. Prepare the appliance for cleaning. → Page 34
2. Clean the appliance, the fittings and the door seals with a dish cloth, lukewarm water and a little pH-neutral washing-up liquid.
3. Dry thoroughly with a soft, dry cloth.
4. Insert the fittings.
5. Electrically connect the appliance.
6. Switch on the appliance. → Page 32
7. Putting the food into the appliance.

11.3 Cleaning the condensation channel and drainage hole

Regularly clean the condensation channel and drainage hole to ensure that the condensation can drain.

▶ Carefully clean the condensation channel and the drainage hole, e.g. using a moistened cotton bud.
→ Fig. 3

11.4 Removing the fittings

If you want to clean the fittings thoroughly, remove these from your appliance.

Removing the shelf

▶ Pull out and remove the shelf.
→ Fig. 4

Removing door racks

▶ Lift the door rack and remove it.
→ Fig. 5

Removing the fruit and vegetable container

1. Pull out the fruit and vegetable container as far as it will go.

2. Press the latch on the pull-out rail downwards ① and remove the fruit and vegetable container ②.
→ Fig. 6
12 Troubleshooting

You can rectify minor faults on your appliance yourself. Read the troubleshooting information before contacting after-sales service. This will avoid unnecessary costs.

⚠️ WARNING
Risk of electric shock!
Incorrect repairs are dangerous.
- Repairs to the appliance should only be carried out by trained specialist staff.
- Only use genuine spare parts when repairing the appliance.
- If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

<table>
<thead>
<tr>
<th>Fault</th>
<th>Cause and troubleshooting</th>
</tr>
</thead>
</table>
| The appliance is not cooling, the displays and lighting light up. | Showroom mode is switched on.  
  - Carry out the appliance self-test. → Page 38  
  - Once the appliance self-test has ended, the appliance switches to normal operation. |
| The LED lighting does not work. | Different causes are possible.  
  - Call customer service.  
    The customer service number can be found in the enclosed customer service directory. |
| The base of the refrigerator compartment is wet. | The condensation channel or drainage hole are blocked.  
  - Clean the condensation channel and the drainage hole. → Page 35 |
| The temperature differs greatly from the setting. | Different causes are possible.  
  1. Switch off the appliance. → Page 32  
  2. Switch the appliance back on after five minutes. → Page 32  
    - If the temperature is too warm, check the temperature again after a couple of hours.  
    - If the temperature is too cold, check the temperature again on the following day. |
| The appliance hums, bubbles, buzzes, gargles or clicks. | Not a fault. A motor is running, e.g. refrigerating unit, fan. Refrigerant flows through the pipes. The motor, switches or solenoid valves are switching on or off. No action required. |
| The appliance makes noises. | Fittings wobble or stick.  
  - Check the removable fittings and, if required, replace these. |
<table>
<thead>
<tr>
<th>Fault</th>

<tbody>
<tr>
<td>The appliance makes noises.</td>
<td>Bottles or containers are touching.</td>
</tr>
<tr>
<td></td>
<td>▶ Move the bottles or containers away from each other.</td>
</tr>
</tbody>
</table>
12.1 Power failure
During a power failure, the temperature in the appliance rises; this reduces the storage time and the quality of the frozen food. The stored frozen food is cooled to the temperature increase time specified on the rating plate. → Fig. 1/3

Notes
- Open the appliance as little as possible during a power failure and do not place any other food in the appliance.
- Check the quality of the food immediately after a power failure.
  - Dispose of any frozen food that has defrosted and is hotter than 5 °C.
  - Cook or fry slightly thawed frozen food, and then either consume it or freeze it again.

12.2 Conducting an appliance self-test
1. Switch off the appliance. → Page 32
2. Switch the appliance back on after approx. five minutes. → Page 32
3. Within 10 seconds of switching on, press and hold °C for three to five seconds until 2 °C lights up in the temperature display.
   - The appliance self-test starts when the temperature displays light up in succession.
   - If, at the end of the appliance self-test, the temperature display shows the set temperature, your appliance is OK. The appliance switches to normal operation.
   - If, at the end of the appliance self-test, Super flashes for 10 seconds, inform the after-sales service.

13 Storage and disposal
You can find out here how to prepare your appliance for storage. You will also find out how to dispose of old appliances.

13.1 Switching off the appliance
1. Switch off the appliance. → Page 32
2. Disconnect the appliance from the power supply.
   - Unplug the appliance from the mains or switch off the circuit breaker in the fuse box.
3. Remove all of the food.
4. Defrost the appliance. → Page 33
5. Clean the appliance. → Page 34
6. To ensure the ventilation inside the appliance, leave the appliance open.

13.2 Disposing of old appliance
Valuable raw materials can be reused by recycling.

⚠️ WARNING
Risk of harm to health!
Children can lock themselves in the appliance, thereby putting their lives at risk.
- Leave shelves and containers inside the appliance to prevent children from climbing in.
- Keep children away from the redundant appliance.
**WARNING**
Risk of fire!
If the tubes are damaged, flammable refrigerant and harmful gases may escape and ignite.
▶ Do not damage the tubes of the refrigerant circuit or the insulation.
1. Unplug the appliance from the mains.
2. Cut through the power cord.
3. Dispose of the appliance in an environmentally friendly manner.
Information about current disposal methods are available from your specialist dealer or local authority.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

14 Customer Service

If you have any queries, are unable to rectify faults on the appliance yourself or if your appliance needs to be repaired, contact Customer Service. Function-relevant genuine spare parts according to the corresponding Eco-design Order can be obtained from Customer Service for a period of at least 10 years from the date on which your appliance was placed on the market within the European Economic Area.

**Note:** Under the terms of the manufacturer's warranty applicable to the location, the use of Customer Service is free of charge. The minimum duration of the warranty (manufacturer's warranty for private consumers) in the European Economic Area is 2 years according to the terms of warranty applicable to the location. The terms of warranty do not affect other rights or claims held by yourself under local legislation.

Detailed information on the warranty period and terms of warranty in your country is available from our after-sales service, your retailer or on our website.
If you contact Customer Service, you will require the product number (E-Nr.) and the production number (FD) of your appliance.
The contact details for Customer Service can be found in the enclosed Customer Service directory or on our website.

14.1 Product number (E-Nr.) and production number (FD)

You can find the product number (E-Nr.) and the production number (FD) on the appliance's rating plate.  
→ Fig. 1/3

Make a note of your appliance's details and the Customer Service telephone number to find them again quickly.

15 Technical data

Refrigerant, cubic capacity and further technical specifications can be found on the rating plate.
→ Fig. 1/3
